

MH 4208

Estofado modulado com estrutura de madeira maciça revestida com espumas e tecido. Além de visual com linhas puras e suaves este modelo possui algumas características especiais, dentre elas estão: As diferentes opções de modulação, as duas opções de almofadas do encosto, as duas opções de largura de braço e as incríveis opções de pés de madeira e pés metálicos. Motivos para ter este estofado em sua casa não faltam. É a união da elegância do living com o conforto do home.

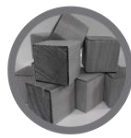

ACABAMENTOS/ REVESTIMENTOS

Acabamentos e revestimentos liberados de acordo com a tabela de preços. São diversos acabamentos e revestimentos para compor peças únicas.

COMPOSÊ

Base/ Almofadas do encosto (grande ou decorativas)

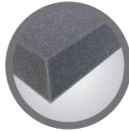

ESTRUTURA DE MADEIRA MACIÇA fixada com grampos metálicos e cola PVA (própria para madeira) a união destes dois componentes conferem à estrutura firmeza e estabilidade evitando rangidos e imperfeições na peça.

PERCINTA ELÁSTICA fazendo a ligação entre o esqueleto e as camadas de conforto, garantindo o suporte necessário para as espumas proporcionando melhor desempenho e durabilidade.

ESPUMA DE ALTA DENSIDADE no assento agregando firmeza e sustentação ao sentar sem perder o conforto e resiliência. Todas as espumas são fabricadas com qualidade superior, eficiência comprovada e de forma ecologicamente correta.

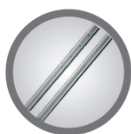

ESPUMA SOFT, no assento possui alta resiliência e maciez, Proporciona maior conforto e suavidade ao usuário, além de permitir maior passagem ar entre as camadas o que aumenta a vida útil do estofado.

MANTA DE ESPUMA ECOSOFT utilizada sobrepondo as demais espumas, a espuma ecosoft tem como principais características a sua maciez e toque suave, permitindo uma sensação única de conforto e aconchego ao sentar.

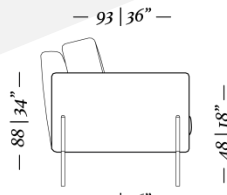

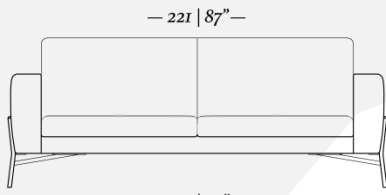

FIBRA POLIÉSTER SILICONADA, nas almofadas decorativas do encosto na opção de almofada decorativa apresenta um toque aveludado e suave, com melhor deslize e fácil manuseio. Além disso, é antialérgica, higiênica e permite maior ventilação. Dessa forma, previne a formação de ácaros e fungos. Sua forma microscópica em espiral confere-lhe alta resiliência, retornando à posição inicial mesmo após pressionada por muito tempo.

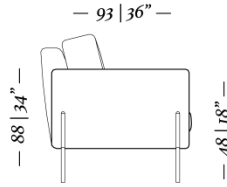

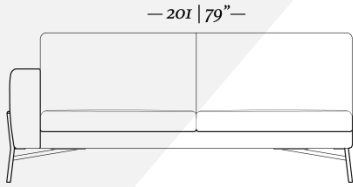

ESTRUTURA METÁLICA montada através de solda e fixa com parafusos metálicos proporcionando firmeza e estabilidade à estrutura.
